EAS (Electronic Article Surveillance) system is the most effective tool to stop shoplifters. AM technology and RF technology are the most common types of EAS systems. Antenna is installed in the exit of store. Tag contain a tiny electronic circuit. When the tag appears in the detection range, antenna gives an alarm. Therefore, when customers enter the store, it is easier for you to make eye contact with them and provide a good shopping experience.

Features

- Anti-interference from metal
- Advance digital signal processing technology
- Stable structure ensures long-lasting durability
- Suitable for wide entrance
- Environmentally friendly
